Marine Ply BS1088

Product No. 013

General Product Description

Product Description	Marine plywood requires durable f/b & core veneers, allows only negligible core gap limiting the chance of trapping water in the plywood and hence do no compromise on bonding.
Areas of application	Intended for environments where it is exposed to moisture for extended period of time. It performs longer in humid and wet conditions and resists delaminating and fungal attack. Boating building, hence marine plywood Hospital & School, fixtures is required to last for 10s of years.
Species	Tropical Hardwood, shorea/ dipterocarpus
Dimensions	T: 5.2, 9, 12, 18mm; W x L: 1220 x 2440mm
No. of ply	3 ply: 5.2mm; 5 ply: 9mm; 7 ply: 12mm, 9 ply: 18mm
Glue	WBP Water Boil Proof, Phenolic formaldehyde
Grade	BS1088, G2S
Weight	Approx. Shorea: 550 - 650kg/cbm; Dipterocarpus: 750 - 850kg/cbm
Moisture contents	MC 8 - 12
Country of Origin	Malaysia
Manufacturing Standards	BS1088 (2003)
Manufacturer Compliance Statement
